- English

## PROFESSIONAL EXPERIENCE

Enthusiastic and driven, I have a deep passion for software development, algorithms and problem solving. Through years of practice and many personal projects, I honed my skills as a programmer, developing a certain versatility in using technologies and coding languages. As I am mostly a self-learner, I can easily adapt to new things and always ready to taken on a challenge.

## WORK EXPERIENCE

### Eplanet Global PVT

#### Dec 2023 - Present

Highly skilled full-stack web and app developer with extensive experience working at Eplanet. Proficient in building and deploying dynamic applications using technologies like React.js, Angular, and Nest.js. Successfully delivered multiple projects, including eCommerce management systems, multi-vendor platforms, and streaming applications using React Native. Adept at creating efficient, scalable solutions with a strong focus on performance and user experience. Passionate about innovation and delivering high-quality code in fast-paced environments.

### Craft Solution Jan

#### 2021 - Oct 2022

- I am working on Craft solution as a Full stack developer, I had the invaluable opportunity to contribute to the development of a Back Office system and gained extensive knowledge in building robust software solutions. Working with a development team, I played a vital role in designing and implementing various features using technologies such as Angular and Nest.js.

### Personal Projects

#### Nov 2020 - Oct 2021

- Nolva company was my first company where I build my developer career and I learnt new features. I was worked on integration test like unit testing and dusk test like browser testing. I was worked laravel 7 with Mysql database and using Vue Js. I was handled back-office-system as a ecommerce development.
